DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a lead for pet, classified in class 340, subclass 586.
 - II. Claims 2, 5, and 7 drawn to collar for pet, classified in class 340, subclass 586.
 - III. Claims 3-4, drawn to an electronic device attached to a pet, classified in class 340, subclass 309.15.
 - IV. Claims 6 and 8-11, drawn to an electronic device disposed on a pet collar for wirelessly reporting the status of the pet, classified in class 340, subclass 539.11.
 - V. Claim 12, drawn to a pet search center, classified in class 340, subclass 686.6.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a lead for pet not using pet collar of group II, electronic device attached to a pet of group III, pet collar electronic device for wirelessly reporting status of the pet of group IV, or pet search center of group V; and vice versa. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
